

 HEALTH TECH INNOVATION

MedLink AI 2.0

Your AI-powered personal health companion —
combining gamification, intelligent bots, and personalized
wellness tracking in one beautiful app.

 LIVE MOBILE APP

 GEMINI AI POWERED

 GAMIFIED HEALTH

 IOS + ANDROID READY

! THE PROBLEM

Why do **people fail** at staying healthy?

No Accountability

People forget to track habits and have no system to hold them responsible.

Generic Advice

Most health apps give one-size-fits-all advice, ignoring your weight, activity, and climate.

Too Many Apps

Separate apps for water, food, sleep, exercise — fragmented and overwhelming.

Lack of Motivation

No rewards, no fun, no reason to keep going. Health becomes a chore.

💡 OUR SOLUTION

One app. Everything you need.

- 🌱 Pixel garden gamification — earn coins & grow your world
- 🤖 AI bots for nutrition, fitness, medical & mental health
- 💧 Smart hydration tracking tailored to your body & weather
- 📊 RAG-powered AI responses grounded in real health data
- 📱 Native mobile app — available on iOS & Android

Sprout — Your AI Health Companion

 KEY FEATURES

Everything in one ecosystem

Pixel Garden

Interactive game world — complete tasks, earn coins, unlock zones & buy furniture

Sprout AI

Personal health chatbot — plans your day, answers health Qs, speaks via voice

Chef Nourish

Nutrition bot with RAG database — verified facts grounded AI responses

Hydration Hero

Smart water tracker — personalized goal, time-gated logging, camera verification

AI Trainer

Personal fitness coach bot with workout plans and exercise recommendations

MedBay

Hospital simulation + doctor recommendations + symptom checker AI

Zen & Yoga

Guided breathing, meditation, and yoga zones inside the game world

Leaderboard

Compete with the community — global rankings drive daily habit completion

Powered by **Fine-Tuning** + RAG

User Asks a Question

Chat input goes to the AI service layer

Vector Search (RAG)

Query vectorized → semantically matched against Supabase nutrition/medical database (768-dim embeddings)

Gemini 2.5 Flash

Generates response grounded in retrieved facts — minimizes hallucination

Verified Answer

Response returned with context from real health data

Domain Fine-Tuning

Nutrition bot utilizes a custom **Fine-Tuned model** trained specifically on health and diet data to nail the exact persona and domain expertise.

Specialised Bots

Each bot has its own system prompt, persona, and knowledge base. Sprout (health), Chef Nourish (nutrition), Trainer (fitness), Doctor (medical).

Function Calling

Bots use AI tool-calling to fetch live weather, local gyms/restaurants, YouTube health videos, and news articles in real-time.

Smart Hydration Hero

📅 Personalized Formula

Base = Weight × 35ml | +500ml if Active | +1000ml if Athlete | ×1.15 if Temp > 30°C

Example: 70kg Active user on hot day → 3.4L (14 glasses)

🕒 Time Gating

Each glass is locked for 30 minutes after the previous — live countdown shown on the button. Prevents instant cheating.

📷 Camera Verification

At 50% and 100% milestones, users must confirm with a photo of their glass/bottle. Two checkpoints, not every sip.

📅 Time Slot Guide

🌅 Morning
7–10 AM

☀️ Midday
10–1 PM

🌞 Afternoon
1–5 PM

🌙 Evening
5–10 PM

 MOBILE FIRST

From **Web** to App Store

React + Vite Web App
Single codebase, zero rewrites needed

Capacitor Wrapper
Wraps web app in native iOS/Android shell

Native Plugins
Camera access, native HTTP (bypasses CORS), status bar, keyboard

App Store Ready
Bundle ID: com.medlinkai.app — ready for submission

 Mobile Fixes Applied

- ✓ Safe area insets (Dynamic Island / notch)
- ✓ Notification API guard (Capacitor compatibility)
- ✓ CapacitorHttp — native HTTP bypasses CORS
- ✓ NSAppTransportSecurity for iOS ATS
- ✓ Bottom nav home-indicator padding

 Bundle Stats

Build: 814 KB gzip ~217 KB | 1,879 modules | Vite 6.4.1
